EXPERIENCE

15+ years

CURRENT CLIENT

Ministry of Culture

WORK STATUS

Transferable Iqama

— PROFESSIONAL SUMMARY

Lead Product Designer with 15+ years across UX strategy, user research, information architecture, design systems and interface design. Currently leading UX for the Saudi Ministry of Culture, where I digitised a catalogue of 50+ employee services into trackable web and React Native workflows that were later extended across every Ministry commission. Research-led and end to end — from user insight through information architecture and design systems to production front-end code — with deep experience in Arabic and right-to-left interface design and in delivering to DGA Code, the Digital Government Authority standard for Saudi government applications.

— PROFESSIONAL EXPERIENCE

User Experience Lead

ITC Infotech (Client: Ministry of Culture, Saudi Arabia) · Riyadh, Saudi Arabia · December 2021 – Present

- Lead UX designer for **Dewane**, the Ministry of Culture employee digital hub — 50+ services across a web portal and a React Native application; the platform was later extended to every commission across the Ministry.
- Defined product vision and scope with executive stakeholders and translated business intent into KPIs, giving cross-functional teams a shared, trackable definition of success.
- Facilitated a cross-team product and technical focus group with the product owner and engineering, then analysed BRD documentation, resolved ambiguous and missing requirements and secured formal sign-off — removing unnecessary functions and feasibility rework before any screen was designed.
- Ran foundational research with Ministry employees: interviews, study of existing manual processes, request journey mapping, workflow comparison and observation of the legacy platform; documented and circulated findings to stakeholders.
- Built the information architecture for 50+ services, defining navigation, task flows and separate role-based paths for employees, approvers and administrators.
- Designed and maintained the design system to Ministry brand guidelines, aligned across web and React Native; predefined components measurably reduced front-end effort and front-end code was generated from the system using Lovable.
- Normalised the approval centre across all approval levels and designed department-level management dashboards, giving leadership request visibility that did not previously exist.
- Scripted and ran usability testing, feeding issues back before and during development; prepared final UI specifications covering breakpoints, states and edge cases, and supported implementation through to completion including design QA.
- Led a team of designers across concurrent product streams, running design critiques, workload planning and quality reviews.

— CORE COMPETENCIES

UX & RESEARCH

UX strategy and roadmapping · User research and interviews · Contextual inquiry · Heuristic evaluation · Competitor benchmarking · Journey mapping · As-is and to-be process mapping · Card sorting and tree testing · Task-based usability testing · Research synthesis

DESIGN

Information architecture · User flows and sitemaps · Wireframing and prototyping · Responsive web design · Mobile application design · Dashboard and data-dense interface design · Design systems and component libraries · Design tokens and variants · Accessibility (WCAG 2.1 AA) · Arabic and RTL interface design

LEADERSHIP & DELIVERY

Design team leadership · Design critique and quality review · Stakeholder management · Executive presentation · Workshop and focus group facilitation · KPI definition · Requirements analysis (BRD) · Developer handover and design QA · Agile and Scrum

TOOLS

Figma · Figma MCP · FigJam · Miro · Claude Code · Cursor · Lovable · React · React Native · Tailwind CSS · Vercel · Git

— PROFESSIONAL EXPERIENCE (CONTINUED)

Lead UX Designer

Antra Info Solutions · Hyderabad, Telangana, India · January 2020 – December 2021

- Lead designer on **Aura**, an HRM tool suite — owned user research, visual design and the creation of its design system.
- Created storyboards, intuitive task flows and user interaction models with usability as the prime objective, and prepared low- and high-fidelity prototypes.
- Built products from existing ideas and shaped new ones from industry experience and knowledge of customers and prospects.
- Ran usability testing activities and user group meetings to validate designs and gather feedback.

Principal Engineer, UI/UX (promoted from Lead UX Designer)

Berkadia · Greater Hyderabad Area, India · July 2017 – January 2020 · Principal Engineer from March 2018

- Led UX and visual design for Berkadia's **Financial Statement Analysis (FSA)** product.
- Created and maintained the design system used across all Berkadia products.

Lead UX/UI Designer

HAPP — The Healthcare App · India · February 2016 – July 2017

- Led the user experience design process for **Happ**, a healthcare application and Apollo 24/7 product — user research, visual design and implementation of the brand style guide.
- Led UX designers and developers to deliver responsive, adaptable interfaces using HTML5, CSS3 and current front-end practice.

Senior UX/UI Designer

Teletext India Limited · Greater Hyderabad Area, India · December 2014 – January 2016

Senior UI Designer

insideidea · Greater Hyderabad Area, India · November 2012 – December 2014

SELECTED PROJECTS

Written case studies for every project below — process, research and outcomes

[kipe.ai](#) ↗

Dewane — Ministry of Culture, Saudi Arabia

Employee digital hub replacing 50+ manual services with trackable digital workflows on web and React Native. Led all nine phases from business intent to developer handover; delivered self-service request raising and tracking, a normalised approval centre, department-level management dashboards and rollout to every Ministry commission.

ROLE

Lead UX Designer

USERS

Ministry of Culture employees

PLATFORM

Web & React Native

Cultural Hub — Ministry of Culture, Saudi Arabia

Public web portal consolidating Saudi cultural heritage, events and initiatives into one accessible platform for citizens nationwide. Rebuilt on DGA Code after a heuristic evaluation and research across several commission departments; fully responsive and immediately recognisable as an official government service.

ROLE

Lead UX Designer

USERS

All KSA citizens

PLATFORM

Responsive web portal

Beyond Business — Qatar Airways

Corporate travel rewards platform covering enrolment, booking, account management, exclusive offers and Qrewards redemption. Led research, information architecture and visual design: stakeholder interviews across marketing, product and engineering, a severity-ranked heuristic audit, benchmarking against four airline loyalty portals, and an architecture rebuilt through card sorting and tree testing — delivering a simplified enrolment flow, clearer navigation and one responsive experience across devices.

ROLE

UX Designer

USERS

Corporate companies & business travellers

PLATFORM

Responsive web portal

CERTIFICATIONS & EDUCATION

CERTIFICATIONS

Human Factors International — Certified Usability Analyst (CUA)

Human Factors International — Certified Experience Analyst (CXA)

Nielsen Norman Group (NN/g) — Certified Certified Scrum Product Owner (CSPO)

EDUCATION

Bachelor of Science, Computer Science

Thank you for considering my profile. I am looking forward to taking on a new challenge, whether as a team leader or an individual contributor.
